ADVANCED ENGINEERING
MAXIMIZING VALUE

COMPANY OVERVIEW

Manta Marine Engineering Sdn Bhd is a Malaysian marine engineering company providing integrated Control, Automation and Support System, marine electronics solutions, and safety-related systems for the maritime sector.

The company supports the operational needs of government agencies, offshore operators, commercial fleets, and marine asset owners by delivering practical, responsive, and technically sound engineering solutions. With capabilities across mechanical systems, electronics, navigation, communication, safety, and vessel support services, Manta Marine Engineering is positioned as a reliable partner for maintaining vessel performance, operational readiness, and long-term serviceability.

Driven by technical expertise and a commitment to dependable service delivery, the company focuses on providing solutions that are efficient, adaptable, and aligned with the evolving requirements of the marine industry.

Control, Automation and Support System

Integrated control, automation and support solutions enhancing vessel monitoring, efficiency, reliability and operational readiness.

Expert In Marine Mechanics

Engines, propulsion systems, gearboxes, hydraulics, steering systems, HVAC, and auxiliary systems.

Marine Electronics & Safety Systems

Navigation, communication, CCTV, sensors, safety systems, and related onboard equipment.

Maritime Operations Support

Services for government agencies, offshore operators, commercial fleets, patrol vessels, search and rescue operations, and specialized marine missions.

VISION

To be a trusted **marine service provider** in Malaysia, recognized for technical reliability, responsive service delivery, and long-term value to the maritime industry.

MISSION

Manta Marine Engineering Sdn Bhd is committed to delivering high-quality marine engineering solutions that support the operational readiness, safety, and performance of every vessel we serve.

We aim to provide practical and dependable services through technical expertise, efficient project execution, innovative solutions, and close collaboration with our clients and partners.

OUR COMMITMENT

Reliable Service Delivery

We focus on delivering solutions that are practical, responsive, and aligned with client operational needs.

Technical Excellence

We apply sound engineering knowledge across marine mechanical systems, electronics, safety systems, and vessel support services.

Efficient Turnaround

We understand the importance of vessel uptime and work towards timely service completion without compromising quality.

Long-Term Partnership

We build lasting relationships through trust, consistency, and a clear understanding of each client's marine operation requirements.

CORE BUSINESS

Marine Equipment Supply & Installation | Control, Automation & Support Systems | Marine Electronics | Safety Systems | Consumables

Manta Marine Engineering specializes in the supply, installation, integration and commissioning of marine equipment, delivering complete engineering solutions for commercial, government and defence maritime applications. Our capabilities encompass marine electronics, safety equipment and consumable items, supported by comprehensive control, automation & support systems to ensure vessels maintain operational readiness, minimize downtime and achieve reliable long-term performance through responsive and technically sound engineering support.

Marine Equipment Supply & Installation

Supply, installation, integration, and commissioning of reliable marine mechanical, electronic, safety, and consumable equipment tailored to vessel operational requirements.

Preventive Maintenance

Scheduled inspection, servicing, and condition checks to identify potential issues before they lead to system failure or operational disruption.

Corrective Repairs

Troubleshooting and repair works for mechanical, electrical, electronic, and onboard system faults to restore vessel functionality and performance.

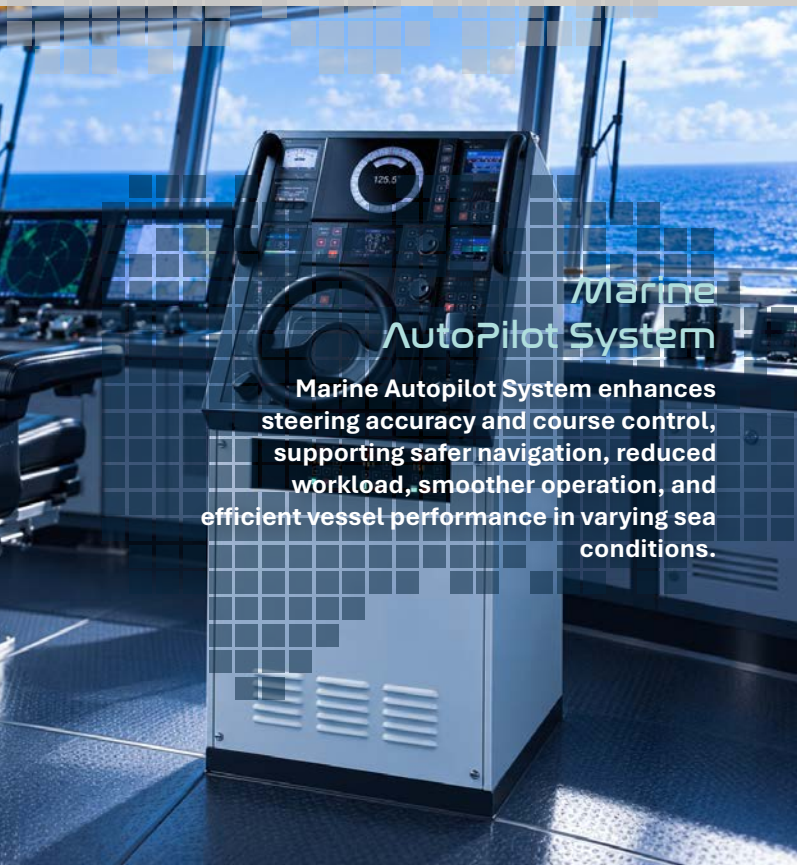

Emergency Support

Responsive technical support for urgent breakdowns, operational faults, and unexpected service requirements that require immediate attention.

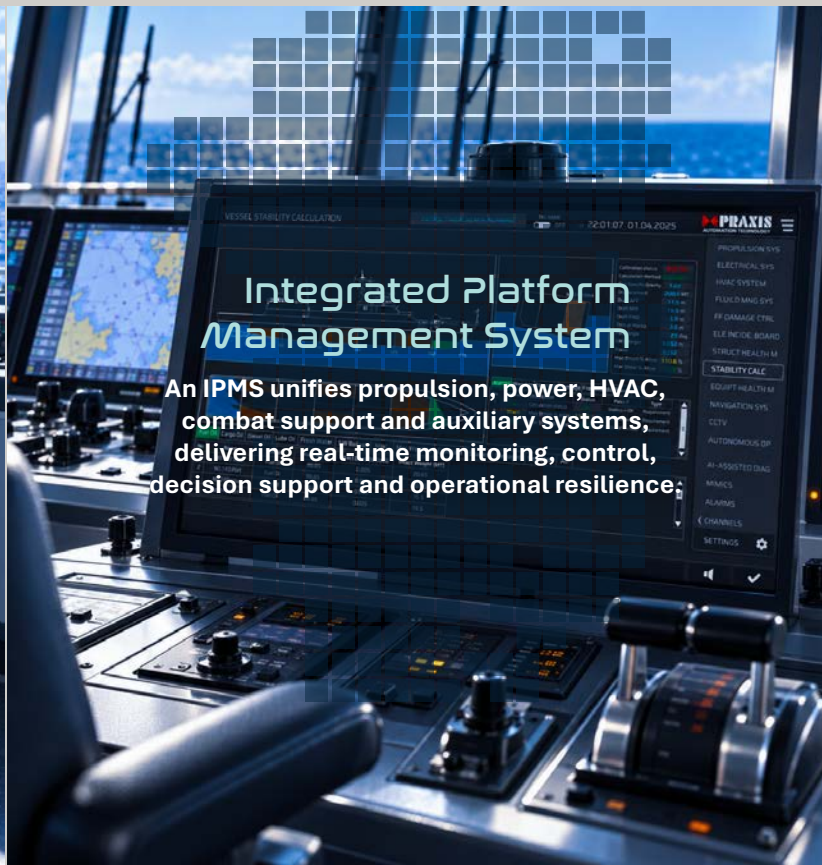

SPECIALIZATION CONTROL, AUTOMATION & SUPPORT SYSTEMS

Manta Marine Engineering expands its Control, Automation & System Support capabilities through leading principal technologies, including Marine Autopilot Systems, Integrated Platform Management System (IPMS), Dynamic Positioning systems, and Helicopter Visual Landing Aid System (HVLAS) - supporting safer, smarter and more efficient vessel operations.

Marine AutoPilot System

Marine Autopilot System enhances steering accuracy and course control, supporting safer navigation, reduced workload, smoother operation, and efficient vessel performance in varying sea conditions.

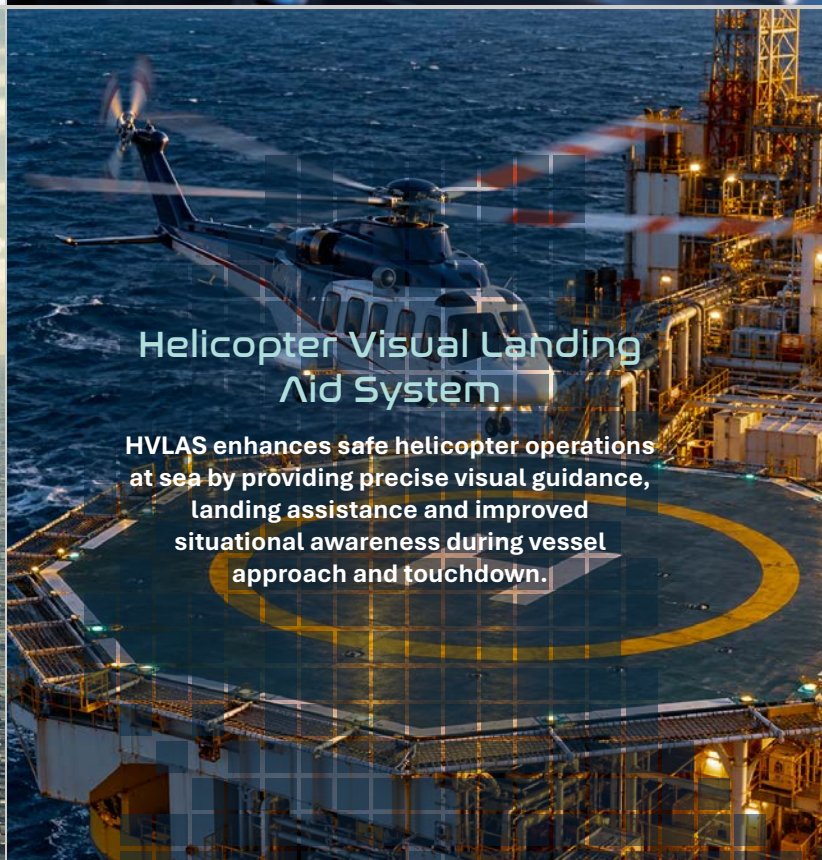

Integrated Platform Management System

An IPMS unifies propulsion, power, HVAC, combat support and auxiliary systems, delivering real-time monitoring, control, decision support and operational resilience.

Dynamic Positioning System

Our DPS integrates thrusters, sensors and environmental data for precise station-keeping, efficient vessel control and reliable offshore operations with minimal crew input.

Helicopter Visual Landing Aid System

HVLAS enhances safe helicopter operations at sea by providing precise visual guidance, landing assistance and improved situational awareness during vessel approach and touchdown.

SPECIALIZATION ELECTRONICS

Manta Marine Engineering provides integrated marine electronic solutions designed to enhance navigation accuracy, onboard communication, operational awareness, and vessel safety. Our capabilities cover the supply, installation, integration, testing, maintenance, and technical support of essential electronic systems for modern marine operations.

Navigation Systems

Integrated navigation solutions that support accurate positioning, route planning, situational awareness, and safe vessel movement.

Key systems: GPS, radar, magnetic and gyro compass, ECDIS and chart plotter, echo sounder, and speed log.

Communication Systems

Reliable onboard communication solutions for clear voice and data connectivity between vessels, shore facilities, operational teams, and emergency services.

Key systems: Marine VHF, MF/HF, VHF airband, portable radio, satellite phone and fax, VSAT, satellite television, intercom, broadcast, PAGA, and CCTV.

Safety Systems

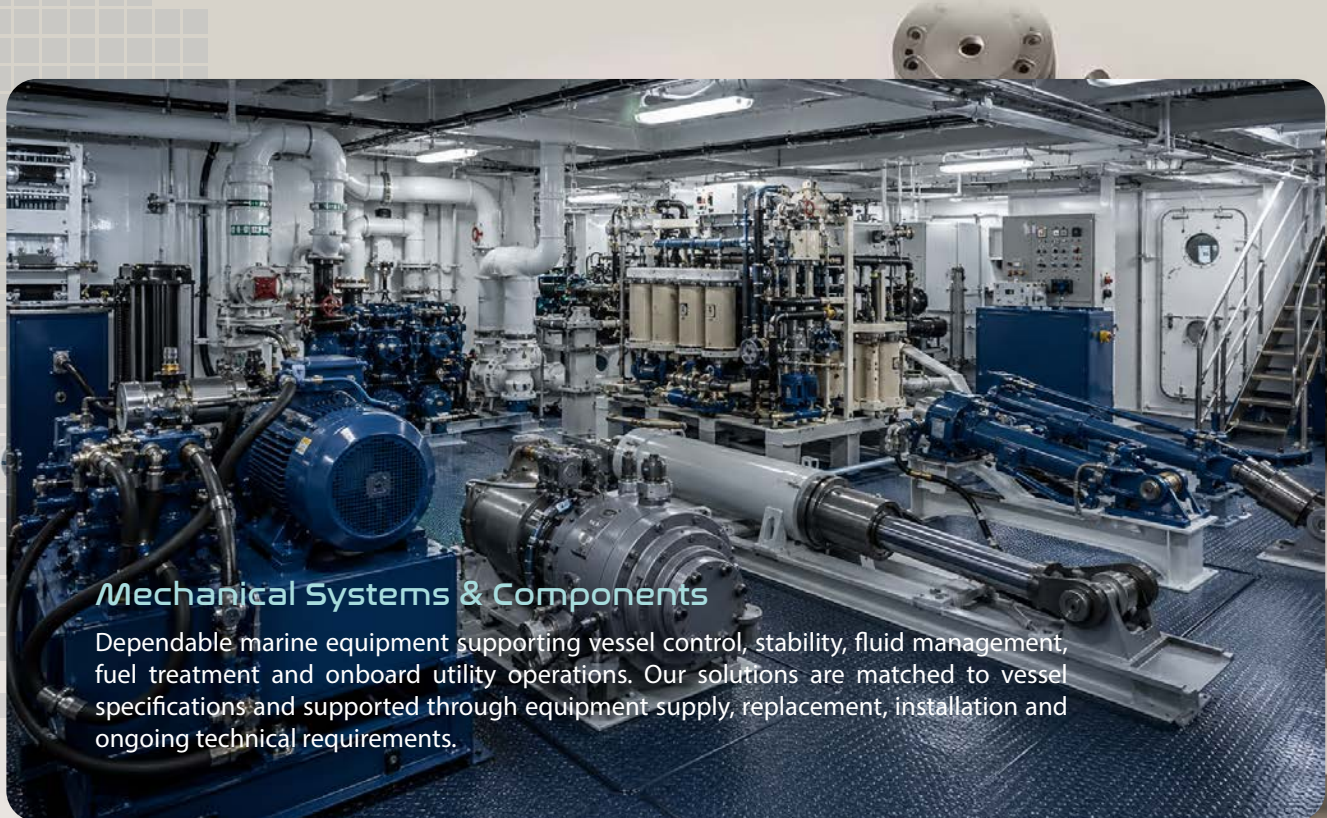

Marine safety and emergency communication systems that support distress alerting, vessel tracking, collision avoidance, incident recording, and coordinated rescue operations.

Key systems: NAVTEX, GMDSS, INMARSAT-C, AIS, EPIRB, SART, RDF/ADF, emergency beacons, and Voyage Data Recorder.

PORTFOLIO: PRODUCTS & SYSTEMS

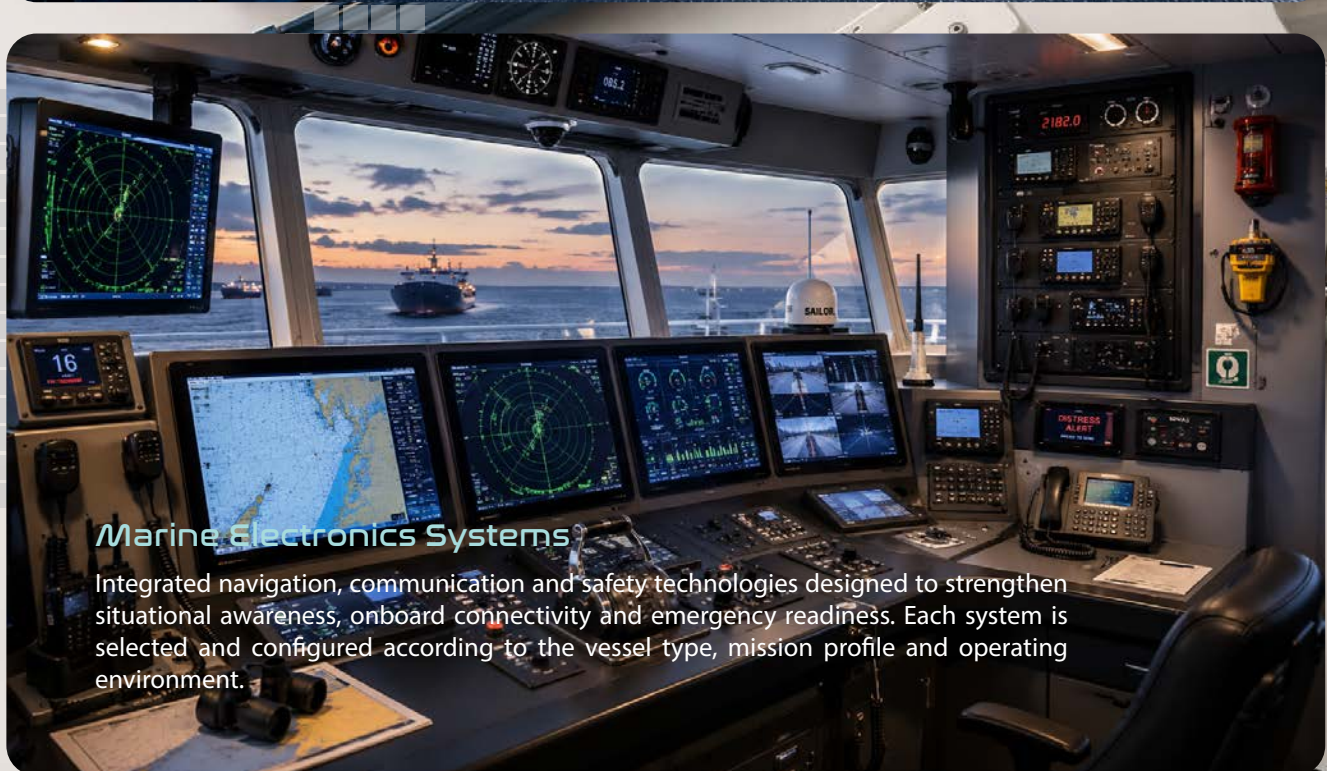

Equipment Supply | Replacement | System Integration & Technical Support

Manta Marine Engineering supplies and supports essential mechanical equipment and marine electronic systems for vessel maintenance, system upgrades, component replacement and new installations. Our portfolio is selected around marine-grade reliability, system compatibility and the specific operational requirements of each vessel.

Mechanical Systems & Components

Dependable marine equipment supporting vessel control, stability, fluid management, fuel treatment and onboard utility operations. Our solutions are matched to vessel specifications and supported through equipment supply, replacement, installation and ongoing technical requirements.

Marine Electronics Systems

Integrated navigation, communication and safety technologies designed to strengthen situational awareness, onboard connectivity and emergency readiness. Each system is selected and configured according to the vessel type, mission profile and operating environment.

CUSTOM RHIB & BOAT DESIGN

Custom Built Rigid Hull Inflatable Boat

Custom RHIB Fabrication

Design and fabrication of rigid hull inflatable boats built for durability, stability, high-speed performance, and dependable operation in demanding marine environments.

Full Customization

Hull configuration, seating, propulsion, electronics, communication, safety equipment, deck layout, and mission-specific features tailored to each client's requirements.

Interceptor Boats

High-performance craft designed for rapid response, interception, enforcement, security, and other operations requiring speed, manoeuvrability, and operational readiness.

SAR & Patrol Design

Specialized vessels configured for search and rescue, coastal patrol, surveillance, emergency response, and government or maritime enforcement missions.

ORGANIZATIONAL STRUCTURE

Manta Marine Engineering Sdn Bhd

A streamlined leadership structure supporting technical excellence, commercial growth, and efficient corporate operations.

COMPANY STRENGTHS

Manta Marine Engineering combines engineering capability, responsive service, and integrated marine solutions to support the reliability, safety, and operational readiness of vessels. Through its mechanical, electronic, safety, and specialized marine capabilities, the company delivers practical support tailored to the needs of government agencies, offshore operators, and commercial fleets.

Technical Expertise

Expertise across marine mechanical, navigation, communication, safety, and integrated vessel systems, supported by established international technology brands.

Rapid Response

Responsive technical support for urgent breakdowns, system faults, and operational requirements, helping clients restore vessel functionality and minimize costly downtime.

Customer Focus

Solutions are tailored to each client's operational environment, vessel requirements, project objectives, and service priorities, with an emphasis on dependable delivery and long-term partnerships.

Integrated Solutions

A coordinated approach encompassing MRO, mechanical engineering, marine electronics, safety systems, vessel support, and specialized marine solutions under one service platform.

Advancing with Technology

Continuous adoption of modern marine technologies, digital tools, real-time data, and predictive maintenance approaches to enhance vessel performance, safety, and operational efficiency.

FUTURE EXPANSIONS

Manta Marine Engineering is committed to strengthening its capabilities and expanding its role within the maritime industry through technology adoption, strategic collaboration, and service innovation.

Advancing Digital Marine Solutions

The company aims to adopt smarter marine technologies, digital monitoring, integrated vessel systems, and data-driven maintenance solutions to improve efficiency, reliability, safety, and operational readiness.

Strategizing Global Partnerships

Manta Marine Engineering will continue building partnerships with established international manufacturers, technology providers, and marine specialists to broaden its technical capabilities, product access, and service coverage.

Building Stronger Capabilities For The Future Of Marine Operations.
